Remote Control Reference Guide — Models, Codes, Pictures & °C/°F Switching

This guide lists every ComfortStar remote control family, the indoor units and models it covers, its remote control code and picture, and — as an added reference — how to switch that remote's temperature display between Celsius and Fahrenheit. Technical Bulletin No. TB260212-01 (Feb 2026)

Remote Control (28E)

Photo	Model	Remote Control Code

	CIP12CA-EL, CIP12CD-EL, CIP18CD-EL, CIP24CD-EL, CIP36CD-EL	22013-007022

Switch to °C / °F

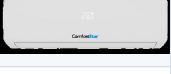

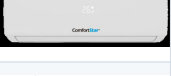

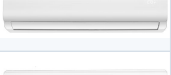

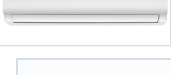

This remote uses a physical DIP switch. Open the battery cover to access it.

- 1) Power off the indoor unit. 2) Adjust the DIP switch as needed and reinsert the battery. 3) Power the indoor unit back on. 4) Set the remote display to 86°F or 30°C. 5) Set airflow to medium. 6) Press ECO 8 times in a row (8 beeps). 7) The unit switches between °C and °F.

DIP positions: °C = Celsius display · °F = Fahrenheit display · Cool = cooling-only mode · Heat = cooling and heating mode.

Remote Control (52T)

Switch to °C / °F — Not Supported

This function is not supported. The temperature is displayed by default in Celsius.

Remote Control

Photo	Model	Remote Control Code
	CCT32-36, NEI32-36, NEI32-60	/

Switch to °C / °F

Press **TURBO** and **TEMP ▲** together to switch between Fahrenheit and Celsius display.

Remote Control

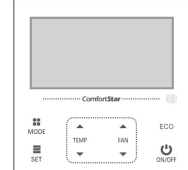

Photo	Model	Remote Control Code
	NEO-C, CCT-C	/

Switch to °C / °F

Press **▲** and **▼** together for 3 seconds to alternate the display between °C and °F.

Wire Controls (Wall-Mounted Panels)

	Basic touchscreen panel	°C/°F selection available on some models. Press ▲ and ▼ together for 3 seconds to alternate the display.
	Icon-button panel (MODE / ECO icons)	On the main screen while powered on, hold TEMP ▲ and FAN ▲ together for 3 seconds. Release once the display switches to save the setting.
	Small icon-button panel	Press the settings icon once, then press and hold the ECO icon to enter setup mode. Use TEMP+ / TEMP- to adjust the parameter.
	Advanced display (function-code style)	When the function icon blinks, press ENTER to open parameter setup. Use ▲/▼ to select function code P6 (Degree Fahrenheit/Celsius display), then press ENTER and set the parameter to F (Fahrenheit) or C (Celsius).

One additional advanced wired panel supports a function-code parameter table: code **P6** sets Degree Fahrenheit/Celsius display, with parameter **F-C** (F = Fahrenheit display, C = Celsius display).
